**DETAILED ACTION**

1. In response to the Office action mailed December 3, 2007 the Amendment has been received on March 3, 2008.

Claims 1, 2, 4, 5, 7 and 8 have been amended.

Claims 10-20 have been newly added.

Claims 1-20 are currently pending in this application.

***Allowable Subject Matter***

2. Claims 1-20 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Claim 1 is allowed because prior art fails to teach or make obvious a collimator comprising: a pair of second plate members, each second plate member having X-ray absorbability and comprising a top surface and an opposite bottom surface, each second plate member top surface connected to an outer surface of a respective first plate member via a hinge in order to block X-rays other than the X-rays passing through the X-ray passing aperture, each second plate member supported on a first end and an opposite second end such that each second plate member is movable obliquely in relation to movement of the respective first plate member and such that each second plate member moves with movement of the respective first plate member as claimed in combination with all of the remaining limitations of the claim.

Claim 4 is allowed because prior art fails to teach or make obvious an X-ray irradiator comprising: a pair of second plate members, each second plate member having X-ray absorbability and comprising, a top surface and an opposite bottom surface, each second plate member top surface connected to an outer surface of a respective first plate member via a hinge in order to block X-rays other than the X-rays passing through the X-ray passing aperture, each second plate member supported on a first end and an opposite second end such that each second plate member is movable obliquely in relation to movement of the respective first plate member and such that each second plate member moves with movement of the respective first plate member as claimed in combination with all of the remaining limitations of the claim.

Claim 7 is allowed because prior art fails to teach or make obvious an X-ray apparatus comprising: a collimator comprising a pair of second plate members, each second plate member having X-ray absorbability and comprising a top surface and an opposite bottom surface, each second plate member top surface connected to an outer surface of a respective first plate member via a hinge in order to block X-rays other than the X-rays passing through the X-ray passing aperture, each second plate member supported on a first end and an opposite second end such that each second plate member is movable obliquely in relation to movement of the respective first plate member and such that each second plate member moves with movement of the respective first plate member and such that each second plate member moves with movement of the respective first plate member; the X-ray apparatus further comprising a detector device for detecting X-rays that pass through the object to be radiographed as claimed in combination with all of the remaining limitations of the claim.

Claims 2, 3, 5, 6 and 8-20 are allowed by virtue of their dependence.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Response to Arguments***

4. Applicant's arguments, see pages 7-12, filed March 3, 2008, with respect to claims 1-20 have been fully considered and are persuasive. The rejection of claims 1, 3-5, 7 and 9 and objection of claims 2, 5 and 8 have been withdrawn.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sundermann et al (US Patent 6,850,596 B2), Cosman (US Patent 5,748,703), Thomas (US Patent 5,396,534) and Flynn (US Patent 4,506,374) teach the dynamic X-ray collimators.
